1. about Us:

- Established in 1987 with a vision of being the industry leader in everything we do. It took us real experience and professionalism while yearning and sticking to our declared goal that we set for our organization from our very beginning. It wasn't long before we earned it; through putting our goal right in front of our eyes working hard on reaching it, the accomplishment that has left us no other option but to be committed to "**the world's every successful business's savior: - continuous improvement**" in order to keep our leadership in front of our valued customers; those who we consider to be our success partners.
- As an industry leader, Safety has always been such a primary goal of our business. Applying a total quality management system that enforces compliance to all HS&E procedures & rules set by the HSE management whether through the maintenance processes, operation processes or even through the administrative processes and the workplace.
- Rady Trans Group provides full **trucking & haulage services** for the world's biggest enterprises with a supply chain that covers all the Middle East area
- We are the only Heavy transportation company in Egypt that has its own fleet of equipment to transfer all kinds of materials "hazardous & nonhazardous" whether from or to remote rigs & platforms all over the Middle East. Owing a fleet of the world's most modern heavy transportation equipment including **heavy vehicles, tractors, flatbed trailers, lowboys and tanker trailers.**
- Rady trans as one of the world's leading suppliers of forwarding and logistics services -in a challenging world of global commerce & international trade- does **Not** only specialize in heavy transport; our range of services extends to contain all end-to-end supply chain management solutions of **hauling, lifting equipment, Global standard customs brokerage and freight forwarding services** . Having **a professional staff whose in-depth industry knowledge, experience and skills** have allowed them to understand the importance and the ceaseless quest for fresh creative solutions and levels of service; the thing that gives them the ability to stand out and meet the challenging vision of our organization of **creating globally-integrated seamless done-deal services** which are furnished in pursuit of our customers' individual needs.

How to become the industry leader:

Starting from:

- Building up a strong and capable fleet of equipment.
- Boosting our fleet capacity.
- Applying modern management and technology systems as to increase the quality of our services.

All the way through:

- Having one respectable HSE Management and policy along with running our well established centralized and mobile maintenance facilities.

How to sustain:

- Now that our clients have been the real motive behind every improvement made, all we need to keep in mind is that it must be continuous.
- Knowing that a new idea will always be there to be welcomed and a new solution to be adopted, as long as there will be always a challenge to be taken.
- We can start formulating our schemes and frameworks only when we declare ourselves, to our valued clients and our potential clients, as well, our mission, our vision and our values statements which define our **purpose as a company** and serve the platform **for every single action and decision we take**, show our perception and awareness of our organization in the future and give us the steer to **continuous improvement and leadership**.

2. Our Mission Statement:

- Providing **globally integrated logistical solutions** through offering a wide range of world class done deal services for the world's global commerce and international trade business.
- Taking full care of any business in need of a **heavy transportation service, lifting equipment or leasing service** and storage spaces for their heavy equipment all over the Middle East area.
- Taking full care of any business working in the field of international trade and that is in need of an **experienced professional customs brokerage service and freight forwarding services**.

3. Our Vision:

"A statement that would set out our aspiration for the future"

What we are aspiring to:

- Initiating swift solutions of any complications that may arise in such a rapid motion world of heavy transportation and logistics; get all the way through with the ability of seizing every obstacle as a new challenge, developing new ideas, applying creativity and continuous improvement strategies.
- Whenever there's a business that is in need of at least one of our services, the most **efficient supply chain services** can never be any greater.
- Obtaining a world wide database of corporate customers with the aspiration to continuously improve and double our business, gaining a customer relation that can be described as a "partnership in success" through accomplishing our work in the most efficient and effective ways helping them to efficiently and effectively accomplish their work in turn.

4. Scope of Services:

- **Engineering solutions and logistics management.**
Heavy haulage and lifting equipment services.

- **Internationally-standardized customs Brokerage and freight forwarding services**

Warehousing:
Warehousing services.

5. Heavy Transportation & Lifting Equipment:

- Rady Trans is the leading heavy transportation and lifting equipment in the Middle East.
- The most quality that distinguishes our heavy hauling and inland transportation services and set them apart from any typical trucking services is safety; we provide the **world's biggest petroleum and petrochemicals companies** with the safest most efficient heavy haulage services throw out the whole Middle East Area.

We own a fleet of the world's most modern equipment to transfer all kinds of materials "**hazardous and non-hazardous**" out or into remote rigs and platforms all over the Middle East.

- Vehicles comprising of conventional hydraulic low-beds, mechanical low-beds, trailers, telescopic trailers, prime movers, tanker trailers, cranes, forklifts, picks up's, hydraulic jacking cylinders, compressors, bulk silos, acid tankers, diesel pumps, generators, and cutting equipment.

6. Freight Forwarding & Customs Brokerage:

- **Rady Trans global standard**, customs brokerage services, whenever you have cargo-duty, we have the experience to deliver it through.

7. Health, Safety & Environment:

- It has been always a primary goal of our organization to be the **industry leader in safety**.
- Being aware of the importance of safety procedures and strategies to apply and practice.
- It's a message that needs to be permanently delivered, and a course of action that needs to be taken.

Aiming at gaining "**safety culture**" through the whole organization that will feature the value of safety to each and every individual within the company and will be applied at every level of it.

8. ERP System:

- As a vendor for ones of the world's biggest enterprises, we have to share our information at times; always being ready for audits performed by auditing teams of our valued clients.
- Our information must be unified, properly recorded-archived, and easily accessed, analyzed and evaluated by our external users as well as the internal users.
- When it comes to our supply chain, in-time-data needs to be provided that an integrated system has to be operating without relying on periodic updates but rather to be automatically updated.
- The ERP system also implies a common data base, which supports all applications in addition to a consistent look and interpretation throughout each module, which makes it easier to work it as for extracting data more accurately and take the decisions more quickly.

Extent:

"The system is applied to include every department throughout the whole company"

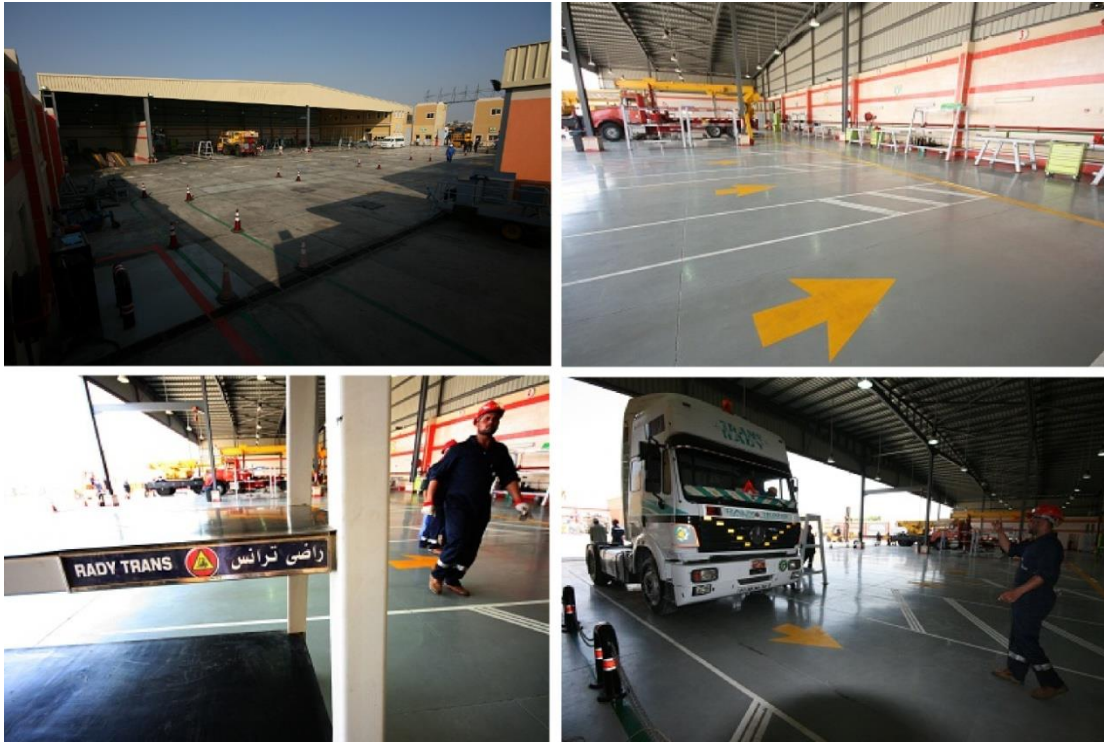

- Finance/accounting: journals entries to general ledger, payables, fixed assets, receivables, budgeting, order to cash, inventory, costing and billing.
- Human resources: payroll, training, development, recruiting, replacements, succession plan, personnel records, working hours, code of conduct, labor law.
- Purchasing: product configuration supplier scheduling, inspection for goods, supplier evaluation, claim processing.
- HSE: safety records, risk assessments, road safety, events statistics, environment, occupational health, daily meetings, investigations.
- Sales and marketing: service, customer contact and call center support.
- Operations: daily journal sheet, counter readouts, journey management records.
- Maintenance: daily, monthly, quarterly, semiannually, annually records, equipment certifications, licenses and mobile workshop transactions.

Outcomes:

- **Chronological history** of every transaction through relevant data compilation in every area of operation.
- **Order tracking** from acceptance through fulfillment.
- **Revenue tracking** from invoice to cash receipt.
- **Matching purchase orders** (what was ordered), inventory receipts (what has arrived) and costing (what the vendor invoiced).

Oracle data base system: allows us to code every **recorded** element of our organization, operate through the integrated data base system, **store** and **keep** our data base in a **safe and secured** way.

- Rady Trans' **regular maintenance** facility is running through our **ERP system** which insures transparent systematic implication in the conduct of workshop operations.
- Our technical team is one of the most **skilled** and **well-reputed** technician teams in Egypt.
- Technicians have to go through a **qualification recruitment process** as in order for them to join Rady Trans. Besides they must continue enhancing their abilities and skills according to our **training and development annual plan**. This may imply several training and **certification courses** including each of them.
- The team members have earned through the years a considerable number of training and certificates, the thing that has always been allowing us an armful of credits and awards for our well-delivered quality service in turn.

Mobile workshop:

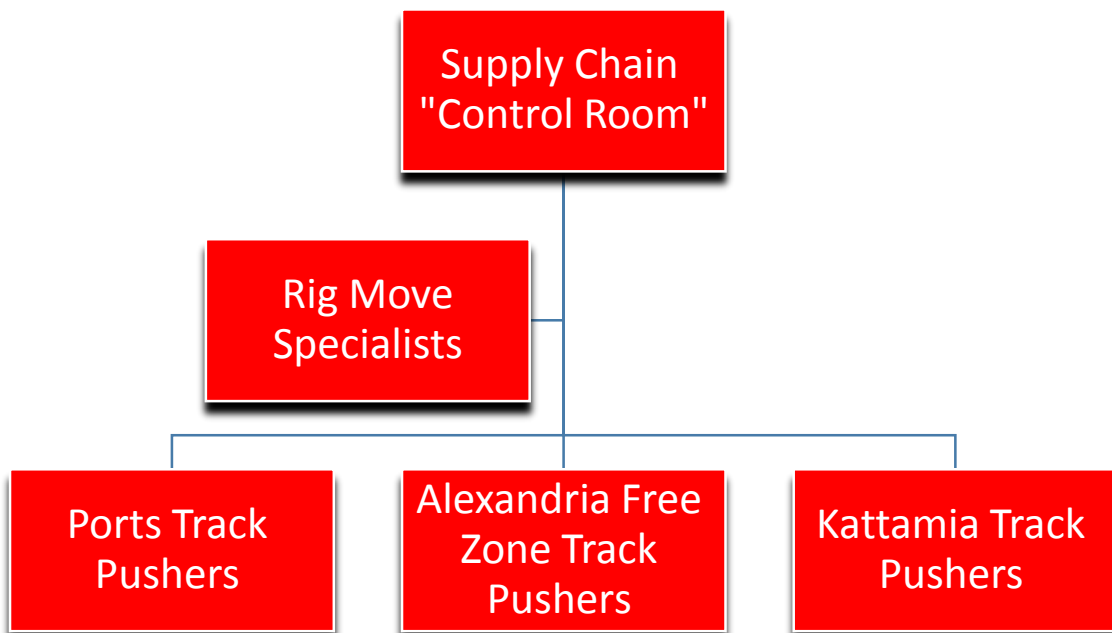

- The purpose of the **mobile workshop** is to serve and maintain our **on-journey** vehicles, the **on-site** equipment located away from regular maintenance facilities.
- The mobile workshop is **equipped** with a large number of several general purpose **maintenance tools and equipment** that makes it convenient for all types of **field maintenance tasks**.

"Attached CD contains a movie that displays the mobile workshop and how it performs its tasks"

10. Fleet Management & Control Room:

For a **successful fleet management system**, the **operation management** needs to be highly proactive and efficient in enforcing **detective, corrective and preventive control measures and procedures**.

Control Room:

- Assembling an **intelligent tracking online system** of **GPS & VDO** devices into each of our vehicles, allowing us to operate through and **around-the-clock control room**.

- The control room serves as well as an **emergency call center**, as appropriate; allocating a steady number to be **well-known** by the company's drivers, clients and any involved partners.
- The online GPS allows us to manage the journeys actually **taking place**, provide continuous **tracking and surveillance 24/7** on the map so that our **HSE and operation** specialists can **promptly correspond** to any action that need to be taken, apply the company's safety rules and policies, make sure that the concerned parties are connected and kept informed of all what goes on the journey.

11. Quality Management:

Rady Trans is **ISO 9001 & OHSAS 18001** Certificated

- Working through **total quality management system** and **occupational health and safety management system**, getting through the initial audit made out by the UKAS in 2011 with **non-conformities** and having to be audited quarterly; insuring our **on-going** commitment toward our business in which we are entitled to always have an eye on **continuous improvement**.
