

HSE Policy

Rady Trans. Is committed to carry out its business in a safe way for the man and the surrounding environment through enforcing HSE measurements that are compatible with the Egyptian and international standards and laws which include:

- Clear committed from **Rady Trans.** To its employees, visitors and contractors to provide a safe and healthy working environment.
- Carry out and achieve ambitious objectives that work to reach the minimum possible accident ratio, and also reduce the pollution through improving the quality of work.
- Providing effective communication systems and continues training to ensure the protection of the safety and health of individuals and environment.
- Subjecting the executive administration to the accountability of the HSE affairs and individual contribution for our employees.
- Make the employees know that commitment to the HSE instructions is one of the major terms to get employed in **Rady Trans.**, and they are responsible for the safety of their selves, their mates, and everybody in their surrounding environment.
- Publish a culture that calls for the authority of stopping the work freely and looking to this as a counter measure to control any threat for the health and safety of the personals.
- Merge all the concerns of HSE including locating the hazards, and controlling them in the decisions, plans and the operations in the business of the company.
- Holding processes of scheduled auditing to the performance and systems of HSE.
- Obeying the rules and regulations worked with beside the HSE measurements.
- Providing the necessary resources to apply this policy.
- Working on publishing this policy.
